SUMMARY

A dependable and detail-oriented Full-stack Software Engineer (React, TypeScript, NestJS) who enjoys solving real problems with clean, practical code. Comfortable working closely with a team, taking ownership of a feature from start to finish, and staying calm when something breaks in production. Curious by nature, always learning new tools, and genuinely enjoys the process of building things that work well for the people using them.

WORK EXPERIENCE

Software Engineer Intern, Toyota Lanka

Jun 2025 – Jul 2026

- Contributed to the development and continuous improvement of a production digital platform, and supported hosting, deployment, and maintenance across multiple enterprise systems (CRM, dashboards, and other internal applications)
- Managed MySQL databases and supported live deployments via GitHub Actions and cPanel, including diagnosing and resolving a backend dependency conflict on the production server with no downtime
- Performed QA testing, functional testing, and User Acceptance Testing (UAT) support across several digital systems, combining manual testing with light automation (Playwright)
- Participated in system analysis, troubleshooting, debugging, and performance improvement activities
- Collaborated with the development team using Agile/Scrum practices and Git-based version control, alongside GitHub Actions CI/CD pipelines
- Prepared and maintained technical documentation to support internal knowledge-sharing

PROJECTS

AI-Powered Child Malnutrition Assessment System | Python · Flask · Scikit-learn · XGBoost · React · MySQL

- Built an ML risk-classification model on WHO growth standards, reaching 99.83% accuracy, to flag malnutrition risk up to 2 months earlier than manual screening
- Built as a final-year research project relevant to Sri Lanka's Ministry of Health domain; results written up as a conference paper in IEEE format

TechWave – Laptop E-Commerce Platform | React · TypeScript · NestJS · MySQL · JWT

- Built a full-stack e-commerce platform with JWT-authenticated accounts, product management, and a real-time AI chatbot for customer support
- Designed a responsive, dark-themed UI backed by a RESTful NestJS API

Sales & Installment Management System | NestJS · TypeORM · MySQL · React · TypeScript

- Developed a role-based platform for customer lifecycle and installment payment tracking, including reporting dashboards and automated payment reminders

FindWork – Freelancing Web Platform | React · Next.js · Node.js · TypeScript · Docker · Vercel

- Owned DevOps and deployment: built a Docker-based environment and CI/CD pipeline for a production job-matching platform connecting employers with skilled workers

EDUCATION

BSc (Hons) Computer Science

2023 – 2026

University of Plymouth — delivered via NSBM Green University, Sri Lanka. Second Class Upper Division.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: NestJS, Node.js, Express.js, REST APIs

QA & Testing: Playwright, UAT, ExcelJS, Excel VBA

DevOps: Docker, GitHub Actions, CI/CD, Linux VPS

Databases: MySQL, MongoDB

Tools: Git, GitHub, Figma, VS Code, Agile/Scrum

AI Tools: ChatGPT, Claude AI, Cursor, GitHub Copilot, Prompt Engineering

CERTIFICATIONS

- Multicloud Network Associate
- Networking Basics
- Intro to DevOps & Site Reliability Engineering (LFS162)
- IEEE Membership (2024 – 2025)
